Who We Are?

AMIAL is a Libyan company specialized in providing oil fields services covering geological & geophysical surveys, engineering studies, production facilities construction, operation, HSEQ, maintenance services, fields general services, technical and logistical support.

Our company established in December 2020 based in Tripoli Libya, with License No.: 4683 (B) valid until 2022 and equipment under Commercial Registration No.: 65330, Chamber of Commerce No.: 3822, Tax File No.: 47374

ASK THE EXPERT!

Our Mission: To localize the Oil and Gas expertise and service, leading to a sustainable local development of the Oil & Gas Sector

Our Vision: To establish a leading company in the field of oil and gas with local capabilities of Libyan oil expertise to meet the Oil and gas sector demands for service and support. A Partnership of real on-hand professionalism

HSE
The Top management of AMIAL Oil Services & Technical Support (AOSTS) is firmly committed to a policy enabling all work activities to be carried out safely, and with all possible measures taken to remove (or at least reduce) risks to the health, safety and welfare of workers, contractors and anyone else who may be affected by our operations. The company also recognizes its duties and responsibilities towards protecting the environment. We are committed to comply with the applicable statutory and regulatory requirement.

Quality
We, AMIAL for Oil Services & Technical Support (AOSTS), committed to deliver the best quality, cost effective on time execution of general, commercial and industrial services. We set objectives and targets to measure our performance and identify opportunities for improvement. We continuously review, adhere and improve our processes and the effectiveness of our Quality Management System to achieve or exceed customer satisfaction. AMIAL also operates in compliance with local legislation requirements

Organization

We conduct our business through an efficiently organized vertical & horizontal management hierarchy

Services

- Geological & Engineering Studies
- Production Services
- Facilities Maintenance
- Field General Services
- Field Civil Works
- Supply's & Procurement
- HSEQ Services
- Technical Support

Production Services

Field Development Plan: In the way of providing Production Service Contracts we review basic data of the oil and gas discovery/field and design for either new **Green field** and/or producing field **Brown field** to generate the needed production engineering plans & drawings, construction procedures, and operating programs. We acquire the necessary geological and reservoir engineering studies, basic and detailed designs of downstream installations, civil engineering, process review and design that meets the customer requirements.

Contracting: It is optional for our customers to arrange for Build Operate Train And Transfer (BOTAT) contract where we build the needed facilities, operate it, train client's staff and eventually transfer it to the client whenever agreed.

Maintenance Services

Global Maintenance, Outsource & Major Repairs

We undertake Global Facility Maintenance programs for Preventative, Predictive or Corrective Maintenance whereby we mobilize the required resources to perform plant turnarounds. We provide in due time the necessary work force, spares, equipment, tools and techniques to overhaul/dismantle equipment/facilities to safety order, inspect and repair as needed. We arrange for prime contracts to execute the Global Maintenance programs as per the client's requirements for the equipment and the manufacturer instructions.

We also outsource the necessary maintenance manpower, skilled and unskilled, along with equipment, tools, machinery, and logistical support for the client to execute Specific Maintenance Contracts (SMC) for special installations and/or equipment (e.g., Power Stations, Turbines, special installations, etc.)

We execute field facilities overhaul, repair and general maintenance on-site and in our workshop in hot or cold status in Libya or abroad in the manufacturer workshops.

Maintenance Services on request:

- Electrical & instrumentation operation, testing and repair technicians and workshops.
- Rotating equipment, pumps, motors, compressors, overhaul & repair millwrights, balancing systems technicians and tool bits.
- Electronic designs, testing and calibrations.
- Piping services, cut & welds, leaks repair, clamping installations and hot tapping.
- Pipe racking, scaffolding and mechanical & electrical site construction.
- Metals works, welding & construction of metal conduits, hangers, workshops, and fences.
- Painting activities and sand blasting of facilities and painting touch up.
- Crude oil tanks cleaning and de-sludging, fluid disposal systems, and related piping network redesign and fabrications.
- Pipelines, flow lines, control valves and flow control systems design, overhaul, installation and repair.
- Wellhead valves and piping site overhaul, paint, housekeeping and fencing.
- Field housing/catering camp services upgrade, repairs and expanding.
- Power systems, electrical generation/transmission units design, repair, upgrade.

Field General Services

- Field equipment cleaning, sandblasting and painting
- Heavy duty/earthmoving services, bulldozers, graders, forklifts, cranes, generators, pumps, etc.
- Provide catering and accommodation services and food supply.
- Field housekeeping, sanitation, and materials mobilization and storing.
- Camp services for laundry, cleaning, room care and camp maintenance.

Field Civil Works

- Field roads build, maintenance and upgrading
- Field air strip build, maintenance, and upgrade
- Field mess halls build, maintenance and upgrade
- Field accommodations build, maintenance and upgrade
- Field Camp entertainment facilities construction and maintenance

Supply & Procurements

Through our host of vendors, supply items and experts in our offices in Libya and in joint with foreign partners, we provide technical and logistical expertise, spare parts, maintenance equipment tools, and other supplements needed for the operating and maintenance. These supplies are classified as follows:

- Electrical
- Instruments
- Mechanicals
- Piping
- Valves
- Metals shapes
- Equipment spares
- Operations consumables such as fluids, lubricants, chemicals, etc.
- Seabats
- Safety gears & PPE
- General supply

Affairless Technical and Support services:

We provide affairless services to clients for our supplied equipment and/or spares including installation, commissioning and troubleshooting. The affairless service is provided in either follow up contract in conjunction with the purchase of the equipment/spare or while installation or renovating / upgrading equipment. It also includes client personnel training and familiarization with the vendor or manufacturer installation and maintenance manuals.

HSEQ Services

We provide HSEQ service to clients in the following area of expertise:

- Safety manual preparation and training
- Personal safety training for first aid, resuscitating, nursing, resuscitating, etc.
- Safety-first field drills and training
- Field hazard isolation and control
- Work permit safety categorization and orientation
- Equipment's gas and fire hazard testing and personnel protection
- Firefighting & safety equipment inspection and certifications
- Equipment entry systems verification, training and certification
- Equipment safety clearance after work testing and certification
- Safety valves inspection and certification
- Firefighting training and firefighting equipment familiarization and training
- Safety work spares inspection, designation, and standardization
- Fluids disposal safety inspection and certification
- Fumes, flares & impacts studies, and evaluation
- Climate/Environment impacts analysis and verification
- Environment performance studies and evaluation
- Less Prevention Control studies and evaluation
- Operations risk analysis and evaluation
- Offshore safety training and certification
- Site safety audits and certification

Projects

AMIAL with its local experts & international partners capable to manage & deliver Oil & Gas projects at different phases:

- Design and engineering
- Tendering
- Project Planning
- Procurements
- Project management services PMS Execution
- Pre-commissioning & commissioning
- Start up and handover

Technical & Manpower Support

We provide technical assistance to our clients in terms of engineering and all technical disciplines support to the client onsite and/or in the office. We provide manpower assistance to the clients in terms of skilled and unskilled manpower in the field facilities and projects. Such manpower services can be arranged through daily rates per function in a price list contract and/or per job package each related to certain jobs and/or projects.
